

## Upgrading To An On-Chain DID - Free for a limited time

Create your on-chain DID for free following this guide. (When the promotion ends, creating an on-chain DID requires a deposit of 2 KILT Coins and a small transaction fee).

First, open your Sporrان extension.

Click “Upgrade to on-chain DID”

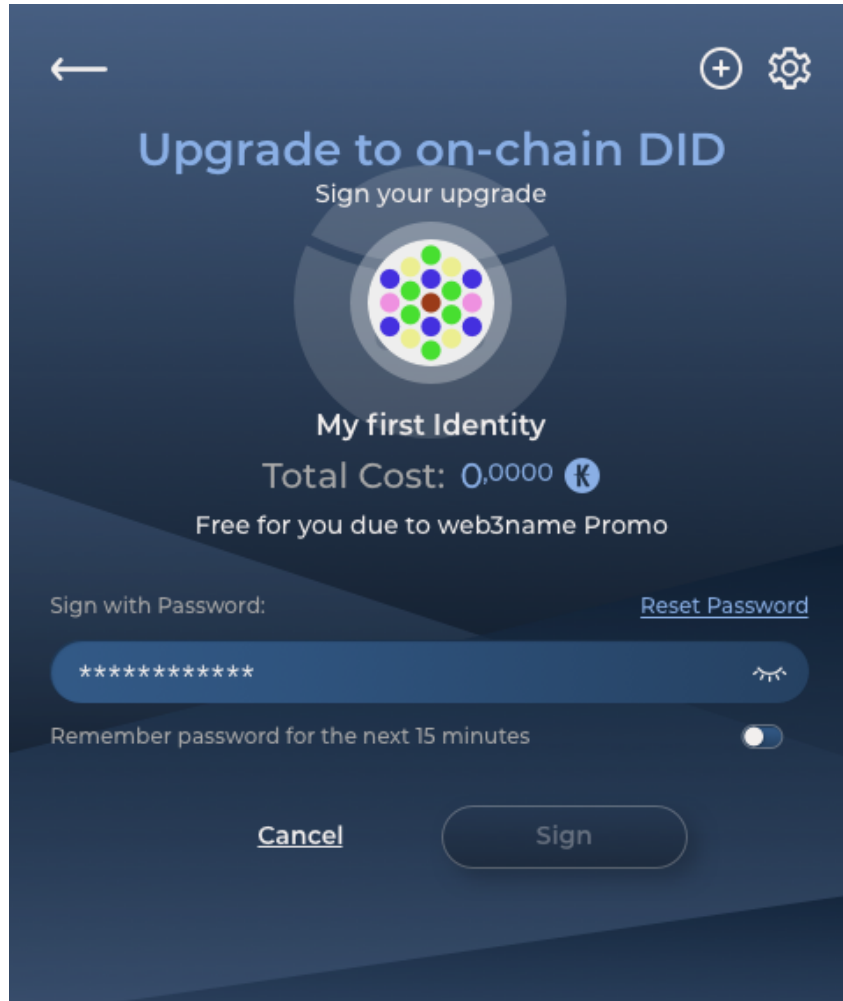

Click and read the Terms.

If you agree, check the box “Use web3name Promo and accept Terms”

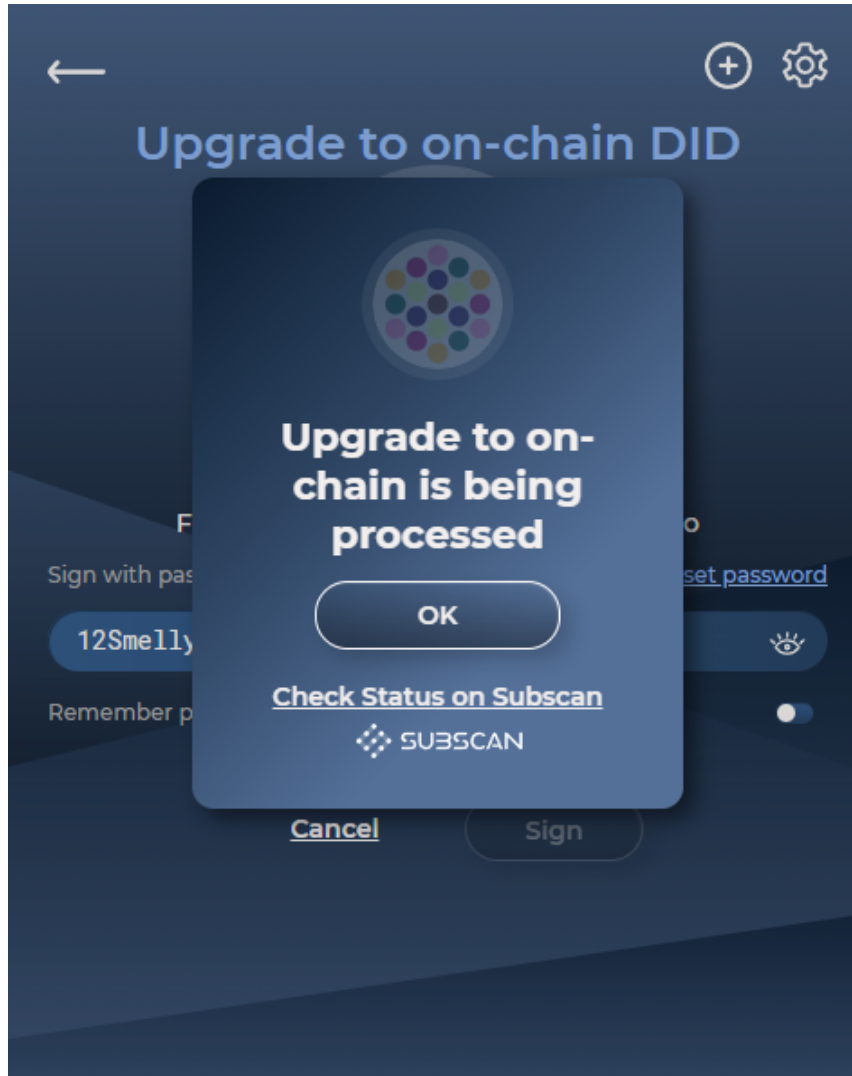

This will create a signed package that is sent to the web3name promo server for payment and submission to the blockchain.

Click “Upgrade”

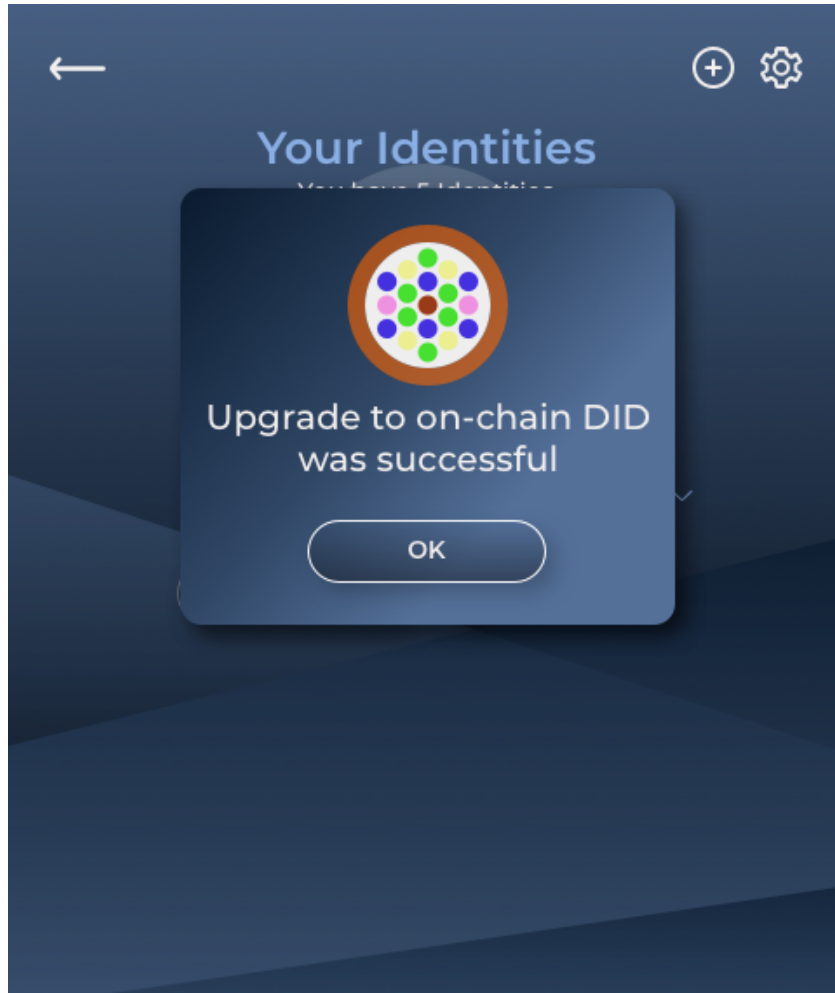

Enter your Sporrán password and click “Sign” to sign the transaction.

This will start the upgrade process.

Click "OK". Or if you want to watch the process, "Check Status on Subscan" to follow the progress on-chain. The process normally only takes a few seconds.

When complete, Click "OK".

That's it! Your DID is now anchored on the KILT blockchain.
